Experience

UILATECH.LLP Jan 2026 - Apr 2026

Machine Learning & Computer vision Intern

- Analyzed and optimized computer vision models for real-world AI applications using YOLO architectures.
- Built Smart Waste Detection and Mushroom Growth Monitoring systems using image-based analysis and object detection.
- Validated and refined YOLO-based object detection models for waste detection and mushroom monitoring, optimizing model performance for deployment.

Technical Skills

Languages: Python, C, C++, SQL
AI/ML & GenAI: Scikit-learn, TensorFlow, PyTorch, LangChain, Hugging Face, RAG, FAISS, Fine Tuning, Evaluations, LLMs
Computer Vision: OpenCV, YOLOv8, YOLOv26, Object Detection, cnn
Data Analytics: Pandas, NumPy, Matplotlib, MySQL
Tools & Technologies: Git, GitHub, Flask, n8n, VS Code

Education

KLE Technological University, Belagavi,Karnataka 2026
B.E. in Electronics and Communication GPA: 7.46CGPA

Government Polytechnic, Vijayapura,Karnataka 2021
Diploma in Electronics and Communication GPA: 6.4 CGPA

Projects

Sleep Apnea classifier

- Developed using ECG time-series data, benchmarking Random Forest (97.94%), SVM (92.12%), KNN, and AdaBoost — applied feature extraction across multiple signal attributes.

RAG-Based Knowledge Assistant

- Built a RAG-based document Q&A assistant using LangChain + FAISS vector search, enabling accurate question answering over custom PDFs — deployed live on HuggingFace Spaces

TB detection system

- Built using Roboflow 3.0 instance segmentation on 2,700 chest X-rays — model segments infected lung regions and outputs affected area percentage, deployed as a Flask web app

Research agent

- Developed using LangChain ReAct+Tavily search that auto-generates structured reports from live web data- integrated with n8n for email-triggered scheduling.

Certifications

HTML & CSS certifications, Let's Upgrade

Machine Learning Using Python, Let's Upgrade

Deep Learning, PREPINSTA

Participated in venture Vibe2.0 And secured Funding

Participated SRISHTI innovates, Acharya institute
